About us

Snaps Plus, located in Placentia, California, specializes in metal fasteners, providing customers with the best possible solutions for their fastening needs. Our team of experts takes the time to listen to our customers, understand their requirements, and proscribe the best solution for their application. Focusing on quality and customer satisfaction, Snaps Plus is your trusted source for metal fastening solutions.

Snap fasteners, like those offered by Snaps Plus, play a critical role in improving industries and sectors, including:

1. The fashion and apparel industry uses snap fasteners in clothing, shoes, bags, and accessories.
2. The outdoor gear and equipment sector uses snap fasteners in tents, tarps, boat covers, and other outdoor gear.
3. Industrial and commercial products use snap fasteners in a wide range of products, including posters, advertising banners, signs, tarps, and covers.
4. Medical equipment suppliers use snap fasteners for hospital gowns and blankets.
5. The transportation and automotive uses snap fasteners in vehicles, trailers, tarps, and covers.

Snap Fasteners

Snaps Plus offers a wide range of snap fasteners to meet various customer needs.

They come in different sizes, with the 24 ligne being the largest.

Our materials include aesthetically pleasing **Brass**, corrosion-resistant **Stainless Steel**, and strong and durable **Steel** for demanding applications.

Snaps Plus offers caps and posts in three different lengths, sockets with three actions (soft, regular, and hard), and studs in standard and low beds, which is helpful when working with various material thicknesses. Customers can select the appropriate length to fit the material they secure, ensuring a stable connection.

Sheet Metal Grommets

Sheet metal grommets are a versatile and durable fastening solution for various applications. They can be used with **plain, tooth, or neck washers**, offering varying levels of reinforcement and stability.

Plain washers are the simplest reinforcement, providing essential support and stability to the grommet. They are ideal for light-duty applications providing a secure grip on the material.

Tooth washers grip the material and provide a firmer grasp, making them ideal for heavy-duty, movement-prone applications requiring added stability.

Neck washers are a two-part reinforcement solution providing added grommet stability. They reinforce the hole on either side, providing a secure grip on the material.

Rolled Rim Grommets

Snaps Plus rolled rim grommets with spur washers are a robust and reliable fastening solution for securing materials together. The rolled rim provides added stability and durability, ideal for heavy-duty applications.

The unique interlocking spur washers ensure the grommets will not easily pull out of fabric. The teeth interlock with the material, providing a secure and durable fastening.

Made from **Brass** and **Stainless Steel**, finishes include **Brass**, **Nickel**, and **Black**, offering superior resistance to corrosion, ideal for harsh environments.

Self Piercing

Snaps Plus self-piercing grommets offer a convenient and efficient solution for fastening materials together. Unlike traditional grommets, there is no need to pre-punch holes, saving production time and effort.

Their single-set piercing action easily punctures materials, creating a seamless, fast, secure, and durable attachment.

Our comprehensive range, crafted from the finest **Brass**, **Stainless Steel**, and **Steel**, is strong, durable, and resists corrosion. We also produce these grommets in eye-catching **Brass**, **Nickel**, and **Black** finishes so you can choose the ideal match for your aesthetic preferences and project requirements.

They are perfect for various applications, including clothing, bags, accessories, and industrial uses. Their reliable and efficient fastening and self-piercing fitting design saves time and effort, making them ideal for busy production environments.

Plastic Grommets

Snaps Plus offers plastic self-piercing grommets, an ideal solution for attaching signs and banners. They are made from high-quality plastic and available in **Clear**, **Black**, and **White** finishes, allowing them to blend seamlessly with any design.

Their self-piercing feature means they are set with a single action, eliminating the need to pre-punch.

The plastic construction is lightweight, durable, resistant to corrosion, and suitable for indoor and outdoor use.

Eyelets and Washers

Snaps Plus offers a comprehensive range of eyelets and washers, expertly crafted to meet the specific needs of various applications. Matching the right eyelet with the appropriate washer ensures a secure and durable connection.

Our A942 eyelet seamlessly integrated with the C62 washer, providing robust support and stability.

Additionally, our A289 eyelet reinforces and stabilizes the C82 washer, ensuring a reliable fastening solution.

The A618 eyelet, combined with the C83 washer, offers a robust and long-lasting fastening option.

Lastly, our A6500 eyelet provides enhanced support and stability to the C84 washer, creating a secure and dependable connection.

Our range of eyelets and washers provides you with confidence when choosing the best solution for your requirements.

Gypsy Studs

Snaps Plus offers gypsy stud fasteners designed for use in a wide range of applications.

Our gypsy studs are available in brass, stainless steel, and steel with various finishes, including **Brass**, **Nickel**, and **Black**, for different design aesthetics often used in cubical curtains and boat covers.

Gypsy studs have a unique design consisting of a stud with a loop at the end, easily secured to the material for quick installation.

Screw Studs

Screw studs are a versatile and reliable solution for securing a ridged surface to a fabric surface. We use **304 and 316 Stainless Steels**, offering superior resistance to corrosion and rust. **Steel** is also available.

Our screw studs can be used effectively on various materials, including wood, fiberglass, and metal, making them popular for applications such as boat covers and cushions.

Available in multiple lengths, our robust screw studs easily accommodate different surface thicknesses, ensuring secure and lasting fixing.

Size Variations	Thread Diameter	Types	Available materials
3/8th, 5/8th, 3/4th, 1 inch	#8 Screw	Self tapping	Stud-Nickel, Black and Stainless Steel
1/2	#8 Screw	Self drilling	Screw-Steel, 304 Stainless Steel or 316 Stainless Steel
5/8th	#10 Screw	Self tapping	Driver-Phillips, Torque, Square

Machines

MECHANICAL PARAMETERS

- Drive mode: servo motor
- Motor power: 0.75KW
- Motor voltage: 220V
- Motor Frequency: 50/60 HZ
- Working throat depth: 80mm
- Working height 35mm
- Working speed:45pcs / min
- Weight:165KG
- Dimensions: 560x830x1260mm

MAIN FEATURES

- Applicable buttons: Four button corns
- Safety performance: Safety finger guard
- Operation mode: Touch screen control
- Fuselage structure: Stainless Steel
- Mechanical Stroke: Punch & Buckle
